

2. (Amended) A method for displaying phases in which components of a system for providing a web architecture framework are delivered as recited in claim 1, wherein a legend is presented which defines the indicia coding with respect to the phases of delivery of the components.
3. (Amended) A method for displaying phases in which components of a system for providing a web architecture framework are delivered as recited in claim 1, wherein the components of the existing system are selected from the group of components including security services, network services, web services, client services, integration capabilities, data services, directory services, management services, operation services, and developer services.
4. (Amended) A method for displaying phases in which components of a system for providing a web architecture framework are delivered as recited in claim 1, wherein the components of the existing system are selected from the group of components including commerce-related services, content-related services, administration-related services, customer-related services, and education-related services.
5. (Amended) A method for displaying phases in which components of a system for providing a web architecture framework are delivered as recited in claim 1, wherein the indicia coding is selected from the group of indicia coding including texture coding, color coding, and shading coding.
6. (Amended) A method for displaying phases in which components of a system for providing a web architecture framework are delivered as recited in claim 1, wherein the existing system is a web architecture framework.
7. (Amended) A computer program embodied on a computer readable medium for displaying phases in which components of a system for providing a web architecture framework are delivered comprising:
- (a) a code segment that displays a pictorial representation of an existing system including a plurality of components;

- C2
- (b) a code segment that presents a first set of components of a system for providing a web architecture framework that are to be delivered in a first phase by indicia coding the same; and
 - (c) a code segment that presents a second set of components of a system for providing a web architecture framework that are to be delivered in a second phase by indicia coding the same in a manner unique with respect to the indicia coding of the first set of components.

8. (Amended) A computer program for displaying phases in which components of a system for providing a web architecture framework are delivered as recited in claim 7, wherein a legend is presented which defines the indicia coding with respect to the phases of delivery of the components.

9. (Amended) A computer program for displaying phases in which components of a system for providing a web architecture framework are delivered as recited in claim 7, wherein the components of the existing system are selected from the group of components including security services, network services, web services, client services, integration capabilities, data services, directory services, management services, operation services, and developer services.

B

10. (Amended) A computer program for displaying phases in which components of a system for providing a web architecture framework are delivered as recited in claim 7, wherein the components of the existing system are selected from the group of components including commerce-related services, content-related services, administration-related services, customer-related services, and education-related services.

11. (Amended) A computer program for displaying phases in which components of a system for providing a web architecture framework are delivered as recited in claim 7, wherein the indicia coding is selected from the group of indicia coding including texture coding, color coding, and shading coding.

12. (Amended) A computer program for displaying phases in which components of a system for providing a web architecture framework are delivered as recited in claim 7, wherein the existing system is a web architecture framework.

- Sup
C3
13. (Amended) A system for displaying phases in which components of a system for providing a web architecture framework are delivered comprising:
- (a) a logic for displaying a pictorial representation of an existing system including a plurality of components;
 - (b) logic for presenting a first set of components of a system for providing a web architecture framework that are to be delivered in a first phase by indicia coding the same; and
 - (c) logic for presenting a second set of components of a system for providing a web architecture framework that are to be delivered in a second phase by indicia coding the same in a manner unique with respect to the indicia coding of the first set of components.
14. (Amended) A system for displaying phases in which components of a system for providing a web architecture framework are delivered as recited in claim 13, wherein a legend is presented which defines the indicia coding with respect to the phases of delivery of the components.
- B
15. (Amended) A system for displaying phases in which components of a system for providing a web architecture framework are delivered as recited in claim 13, wherein the components of the existing system are selected from the group of components including security services, network services, web services, client services, integration capabilities, data services, directory services, management services, operation services, and developer services.
16. (Amended) A system for displaying phases in which components of a system for providing a web architecture framework are delivered as recited in claim 13, wherein the components of the existing system are selected from the group of components including commerce-related services, content-related services, administration-related services, customer-related services, and education-related services.
17. (Amended) A system for displaying phases in which components of a system for providing a web architecture framework are delivered as recited in claim 13, wherein the indicia coding is selected from the group of indicia coding including texture coding, color coding, and shading coding.
